## Preface

Children create beautiful world of boundless imagination in their mind. Many colourful images flock there. To invigorate this world of imagination with proper education philosophers, development psychologists, child specialists and educationists are working relentlessly. They are making constant effort to address how a child's mind and brain work. Effective education ensures a child's all-round development through the proper use of their unlimited sense of wonder, curiosity, enjoyment, interest and enthusiasm. In keeping with the effort to ensure a balanced development of the children through active and experiential learning the National Curriculum of Bangladesh has been revised in the year 2021.

According to the instructions of Hon'ble Prime Minister Sheikh Hasina, National Curriculum and Textbook Board (NCTB) has been distributing free textbooks to the learners of pre-primary to grade ten level since 2010. As per her directions, NCTB has also arranged the learning competencies in the new revised curriculum emphasizing creating learning experiences considering global and local needs, the 4<sup>th</sup> Industrial Revolution, SDG 4 (Sustainable Development Goals) and Bangladesh's Vision 2041. The English language textbook "**English for Today**" has also been produced addressing all the requirements.

There has been a growing need of English language proficiency in the rapidly changing, technology-driven world of the 21<sup>st</sup> century. With a view to addressing the need, the new revised curriculum aims at enabling the learners to carry out their day-to-day activities in any English-speaking context. As such, the textbook has been designed to facilitate their effective communication through four basic language skills, proper pronunciation, integration of both local and global cultures, inclusiveness and 21<sup>st</sup> century skills like critical thinking, problem solving and creativity.

The dedication of the contributors – writers, editors, evaluators, reviewers, coordinators, and personnel supporting its printing and publication has enriched the textbook. As the book has been produced within a very short time, any constructive suggestions for further improvement of the textbook will be highly appreciated. I believe that the use of this textbook will be proved effective and impactful for all the children of our primary education system.
